

Product Datasheet

Exceed™ Flow m 0520 Series

(Legacy name: Enable™ 2005 Series) Metallocene Polyethylene

Product Description

Exceed $^{\text{TM}}$ Flow m 0520 resins are ethylene 1-hexene copolymers. Exceed $^{\text{TM}}$ Flow performance polymer resins offer an outstanding balance puncture. Easier processing and excellent properties lead to significanthigh pressure LDPE replacement in many applications, yet with superior drawdown and enhanced toughness. TnPP is not intentionally added to Exceed $^{\text{TM}}$ Flow m 0520 resins.

General						
Availability ¹	Africa & Middle EastAsia Pacific		EuropeLatin America		North America	
Additive	 Exceed™ Flow m 0520.MC: Antiblock: No; Slip: No; Processing Aid: Yes; Thermal Stabilizer: Yes Exceed™ Flow m 0520.PA: Antiblock: No; Slip: No; Processing Aid: No; Thermal Stabilizer: Yes Exceed™ Flow m 0520.ME: Antiblock: 2000 ppm; Slip: 500 ppm; Processing Aid: Yes; Thermal Stabilizer: Yes

Product Datasheet

ExonMobil

Exceed™ Flow m 0520 Series Metallocene Polyethylene

Legal Statement

Contact your ExxonMobil Chemical Customer Service Representative for potential food contact application compliance (e.g. FDA, EU, HPFB).

This product is not intended for use in medical applications and should not be used in any such applications.

Tris(nonylphenol)phosphite (TNPP) CAS# 26523-78-4 is not intentionally used by ExxonMobil in this product. Although this product is not routinely tested for its presence, based on product composition knowledge this substance is not expected to be present. However, the fact that this substance is not intentionally used by ExxonMobil in this product does not exclude that trace levels of this substance may be present as a result of the specific characteristics of the raw materials and/or of the manufacturing process.

Processing Statement

Film (1 mil / 25.4 micron) made on a 2.5 inch (63.5 mm) blown film line with a 2.5:1 blow-up ratio, a melt temperature of 380- 400°F (193 - 204°C), a 30 mil (0.76 mm) die gap at a rate of 10 lbs/hr/in die circumference (1.79 kg/hr/cm).

Notes

Typical properties: these are not to be construed as specifications.
