

SABIC® LLDPE 128CNJ

LINEAR LOW DENSITY POLYETHYLENE

DESCRIPTION

128CNJ is a Linear Low Density Polyethylene natural resin designed for extrusion applications. This grade is combining stiffness, toughness, high melt strength with an excellent processability due to its broad molecular weight distribution. It is TNPP free and contains an optimized level of stabilizers and does not contain any slip or anti-block additives.

TYPICAL APPLICATIONS

Bedding and Jacketing for low/medium voltage power cables and jacketing for telecommunication cables, electrical conduits and drip & irrigation pipes.

STORAGE AND HANDLING

LLDPE resin should be stored in a manner to prevent a direct exposure to sunlight and/or heat. The storage area should also be dry and preferably do not exceed 50°C. SABIC would not give warranty to bad storage conditions, which may lead to quality deterioration such as color change and inadequate product performance. It is advisable to process LLDPE resin within 6 months after delivery.
